About

Software engineer with 17+ years of experience building and shipping full-stack JavaScript/TypeScript products for production environments. Delivered business-critical developer tooling, cloud services, and large-scale performance improvements across enterprise applications at Microsoft, EPAM, and Akvelon. Experienced in end-to-end software delivery, from product design and implementation through CI/CD and production operations.

Education

Yaroslavl Demidov ^{2004 - 2009}

State University

Mathematics and
Computer Science

Experience

2024 - Present

Software Developer Engineer @ **Microsoft**

Prague, Czechia - On site

2023 - 2024

Lead Software Engineer @ **EPAM Systems**

Prague, Czechia - On site

Overview:

Customer: Albert Heijn. Full-stack developer on Engineering Enablement project.

Technical details:

- Evolved internal plugins for Backstage (Spotify) developer portal

- Designed and implemented internal tools to integrate with third-party cloud solutions

- Led refactoring initiatives across the platform

2022 - 2023

Senior Software Engineer @ **EPAM Systems**

Prague, Czechia - On site

Overview:

Customer: London Stock Exchange Group. Performance optimization across enterprise web applications.

Technical details:

- Conducted performance analysis and applied optimization techniques on 30+ web applications

- Added heap snapshot capability to the QA framework

- Coordinated cross-team task execution for performance improvements

2017 - 2021

Senior Software Engineer / Tech Lead @ **Akvelon, Inc.**

Yaroslavl, Russia → Prague, Czechia - On site

Overview:

Outsourced to Microsoft across multiple projects. Led teams of 6 engineers on greenfield projects.

Technical details:

Built Azure Blockchain Extension for VS Code from scratch — architecture, MVP, CI/CD, cross-platform support

Designed Node.js tool deploying k8s infrastructure for Hyperledger private blockchain

Built CHIE suite: OKR Tool, QaaS (KPI tracking), Cloud Readiness Criteria — Angular/Ionic/.NET Core/Azure

Created TypeScript decorator library implementing Retry, Circuit-breaker, Memo, Singleton, FSM patterns

Contributed to Hyperledger Fabric SDK

2008 - 2017

Software Engineer → Team Lead @ Tensor (Тензор)

Yaroslavl, Russia - On site

Overview:

9 years building a large-scale enterprise web platform — from junior engineer to team lead.

Technical details:

Designed and implemented SSR, i18n/l10n, and HTML generator from custom XAML-like modules

Built a resource bundler (like Webpack) with tree shaking using Node.js, Grunt, Gulp, ESprima

Refactored monolith into 200+ micro-frontend modules with RequireJS

Designed and implemented BFF service with Node.js, Redis, Express, Cluster

Built client-side desktop app with WebSocket communication, file system access, and cryptography (Java applets, C#, ActiveX)
